## OBJECTIVE

I am a motivated and detail-oriented full-stack web developer with hands-on experience in building dynamic and responsive web applications using React.js, Node.js, and MongoDB. Skilled in creating secure, scalable, and user-friendly solutions, including e-commerce platforms and decentralized applications. Experienced in integrating authentication, real-time features, and backend APIs. Passionate about learning new technologies and building impactful digital solutions.

---

## PROJECTS

### Billing Software - GMAutocare

- Developed a web-based billing system using HTML, CSS, JavaScript
- Integrated MongoDB for customer, product & invoice data
- Enabled dynamic invoice generation with GST/tax calculation
- Implemented service-wise rate handling and print support
- Designed for daily transaction management

### Kelvimaiyum – Question & Answer Platform

- Built with React.js (frontend) and Node.js (backend)
- Real-time question & answer handling with MongoDB integration
- Features: user auth, upvotes/downvotes, category filtering
- Clean, responsive UI for both mobile and desktop

### Food Order Application

- Developed a dynamic food ordering app using React.js
- User-friendly interface for browsing menus and placing orders
- Enabled cart management and seamless order flow

---

## EXPERIENCE

### Siva Digital
